

COMMERCIAL FLASHING

Pitch Pans

FlashMaster offers a complete line of quality pitch pans in a variety of popular sizes. One piece Standard (3 3/4" deep) pitch pans have one end that opens for easy wrap-around installation. The two piece Lo-profile (2 1/2" deep) pitch pan is ready to install.

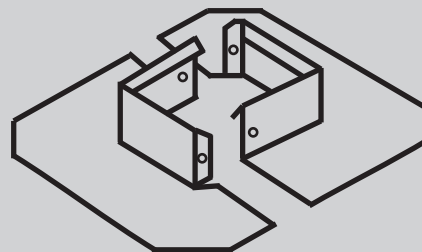

STANDARD

26 ga Galvanized
.032 mill finish Aluminum
4", 6", 8", 10", 12" square
one end opens for easy
installation

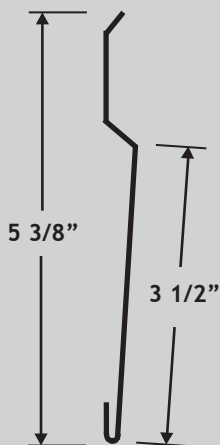

LO-PROFILE

26 ga Galvanized
4", 6", 8", 10", 12" square
2 piece ready to install

Surface Mounted Counterflashing

This flashing is ready to install in easy 8 ft. lengths. The pre-notched ends allow smooth alignment and proper end lap in either direction. It secures tightly against the wall, with built-in caulk tray for sealing. The smooth under hem is snug to the wall flashing. No clean up is necessary.

Extension Flashing

FlashMaster products are designed and manufactured to minimize problems and facilitate installation. Our commercial pre-notched flashing is ready to install, thus saving manual notching at the job site and collection of scrap to prevent possible roof failure. Labor dollars are saved, and the end result is secure seams with a professional appearance.
